

Hepatitis B Surface Antigen testing
11,720 orders / 9,931 patients

Hepatitis B vaccine
14 days or less prior
to HBsAg testing

34 patients

Hepatitis B vaccine
15-30 days prior
to HBsAg testing

81 patients

Hepatitis B vaccine
31-180 days prior
to HBsAg testing

88 patients

No hepatitis B
vaccine with the
prior 180 days

11,517 patients

HBsAg Results:
Non-reactive: 23
Grayzone: 11
Reactive: 0

HBsAg Results:
Non-reactive: 81
Grayzone: 0
Reactive: 0

HBsAg Results:
Non-reactive: 87
Grayzone: 0
Reactive: 1

HBsAg Results:
Non-reactive: 11,219
Grayzone: 32
Reactive: 267

Grayzone attributed
to prior vaccine: 11

Confirmation testing
for grayzones:
Negative: 0
Reactive: 6
Not performed: 5

Grayzone or reactive
attributed to prior
vaccine: 0

Grayzone or reactive
attributed to prior
vaccine: 0
(1 reactive result due
to actual hepatitis B
infection)

Confirmation testing
for grayzones:
Negative: 21
Reactive: 4
(all 4 with other tests
consistent with
chronic hepatitis B)
Not performed: 7
