

Figure S2 The *alsSD* operon in different strains.

The *alsSD* operons include that of *Bacillus licheniformis* 10-1-A (AJLV00000000.1), *B. subtilis* 168 (NC_000964.3); *Serratia marcescens* MG1 (JF519735, JF519736, JF519737); *Klebsiella pneumoniae* NTUH-K2044 (NC_012731.1); *Enterobacter cloacae* subsp. *dissolvens* SDM (CP003678.1). The numbers represent the identities of the protein sequences in different strains with that of strain 10-1-A.
