The bar chart shows the number of SNPs across different minor allele frequencies (MAF). The x-axis represents the MAF ranges (0.05−0.10, 0.10−0.15, 0.15−0.20, 0.20−0.25, 0.25−0.30, 0.30−0.35, 0.35−0.40, 0.40−0.45, 0.45−0.50), and the y-axis represents the number of SNPs. The chart indicates an increasing trend in the number of SNPs as the MAF increases.
