

Supplemental Figure 2. The heat map of the differential expressed genes (DEGs).

Green and red indicated lower and higher expression, respectively. The color scale

was shown in the upper right. A, Clustering and heat map of expression values for

DEGs between HY ovary and HY stigma. B, Clustering and heat map of expression

values for DEGs between HY pistil and *dst* ovary. C, Clustering and heat map of

expression values for DEGs between HY ovary and *dst* ovary.
