Figure 2

A. Simple clinical model

B. Complex clinical model

Figure 2. Receiver operating characteristics curve of risk models of diabetes after GDM pregnancy with or without wGRS. A. The incorporation of wGRS into a simple clinical model consisting of age, family history of diabetes, and prepregnancy BMI. B. The incorporation of wGRS into a complex clinical model consisting of age, family history of diabetes, prepregnancy BMI, mean arterial pressure, fasting glucose, and fasting insulin concentration.
