Figure S3. Archaeal 16S rRNA gene amplicon profiles from the different horizons of three Podzol profiles after DGGE. A, E, EB, BE, Bhs and Bh2, soil horizons. Bh-S and Bh1-S, soil adjacent to the bleached mottles. Bh-M and Bh1-M, soil in the bleached mottles. M, molecular marker. Numbers represent individual samples. A. Bertioga profile (BT), B. Ilha Comprida profile 1 (IC1), C. Ilha Comprida profile 2 (IC2).
