Box and whisker plots with outliers illustrating the MAV (A), TLG (B) and cTLG (C) for the benign and malignant population on both the 60- and 180-min images. The blue and red plots represent the values from the 60-min and 180-min images, respectively. Abbreviations: MAV, metabolic active volume; TLG, total lesion glycolysis; cTLG, TLG with partial volume correction.
