Mean concentrations of metals with standard error in the lichen *Usnea aurantiaco-atra* (Wojtun, our investigation) compared with 1) data of Osyczka et al. (2007) only in the vicinity of our investigation (Osyczka), 2) data from all sites (Osyczka All) on King George Island (including those in the vicinity of our investigation) reported by Osyczka et al. (2007) and 3) data from all sites reported by Poblet et al. (1997)
