Powder x-ray diffraction patterns of (A) ethylene and (B) phenylene PMOs Supplementary Information
Powder x-ray diffraction patterns of (C) methylene and (B) pure silica nanoporous materials
Nitrogen gas adsorption/desorption isotherms and pore size distributions (insets) of (A) ethylene, (b) ethylene PMOs
Nitrogen gas adsorption/desorption isotherms and pore size distributions (insets) of (A) methylene and (b) pure silica nanoporous materials.
Supplementary Information

Thermogravimetric weight loss curve and derivative plot of as-synthesized methylene-bridged PMO.
