Figure S2  Response of *dss1* to exogenous GA and BR. (a) Phenotype of one-week-old plants grown with and without GA. Bar = 5 cm. (b) Quantification of height of the plants shown in (a). Values are mean ±SD, *n* = 14. (c) Phenotype of one-week-old plants grown with and without epi-BL. Bar = 5 cm. (d) Quantification of height of plants shown in (c). Values are mean ±SD, *n* = 12. Asterisks indicate significant differences as determined by Student’s *t* test (***, *p* < 0.001)
