Fig. S4 Examples for heterozygous genotypes of hybrids at the trinucleotide repeat locus PMGC14: alleles are 2, 3, 4 or 5 nucleotides apart

A  P. deltoides × P. simonii, clone “H989”
B  P. maximowiczii × (P. laurifolia × P. nigra), clone “Oxford”
C  Unknown intersectional hybrid, clone “B963”
D  P. deltoides × P. maximowiczii, clone “H960”
