Supplementary Data Figure S3

**S3: TA activates Caspase 8 and 9 in Jurkat cells.** Jurkat cells were treated with 25, 50, and 75 μM TA and the activity of caspase 8 and 9 was measured at 24 and 48 h post-treatment using Caspase-Glo kits as described in the methods section. As shown above, TA caused a dose-/time-dependent response in the activation of caspase 8 and caspase 9.
