Radiation Therapy

What you need to know to get ready for your CT planning appointment

PROSTATE, RECTUM and ANAL CANAL CT-Planning

You will need an empty rectum and a full bladder for pelvic (prostate and rectum) radiation therapy CT planning and your radiation treatments.

Please try to have a bowel movement before you come in for your planning appointment. Please drink 500 ml of water 45 minutes before your appointment time. This will allow for your bladder to be full.

If you need to go to the washroom and cannot hold your bladder, please let your radiation therapist know and begin to drink again.

Drink 500 ml of water 45 min before your appt
