Supplementary Fig. 1 Analysis of knockout lines of At5g54330, At5g54350, and At5g54360. A. T-DNA insertion sites are indicated. Gray and white boxes indicate exons and an intron, respectively. B. Genotyping of the wild type and homozygous mutant using primers is indicated. C. Phenotypes of the wild type and knockout lines of At5g54330, At5g54350, and At5g54360. All knockout lines exhibit normal phenotypes.
