Supplementary Fig. 1

Supplementary Fig.1. Sequence analysis of the TACI gene in index CVID and IgAD patients. 

a. Nucleotide chromatographs of patients' TACI genomic DNA in the region of mutation. The sequence of the same region in a normal subject is shown immediately under. 

b. Nucleotide sequence profile of genomic clones representing the two alleles of patient C12 in the regions containing the T310->C mutation and the A204 insertion.
