**Supplementary Figure 2** Predictive markers for the viral-load response following the DC vaccination. (a) Correlation between baseline PVL and one-year changes of PVL. (b) Correlation between baseline CD4 cell count and one-year changes of PVL. (c) Correlation between baseline virus-specific IL-2-expressing CD4$^+$ T cells and one-year changes of PVL. (d) Correlation between baseline virus-specific IFN-γ-expressing CD4$^+$ T cells and one-year changes of PVL. (e) Correlation between baseline virus-specific IFN-γ-expressing CD8$^+$ T cells and one-year changes of PVL. (f) Correlation between surface CD83 expression of DCs and one-year changes of PVL.
