Supplementary Information for Efficacy and Safety of Very Early Mobilization in Patients with Acute Stroke: A Systematic Review and Meta-analysis

Title of manuscript:
Efficacy and Safety of Very Early Mobilization in Patients with Acute Stroke: A Systematic Review and Meta-analysis
Tao Xu, Xinyuan Yu, Shu Ou, Xi Liu, Jinxian Yuan & Yangmei Chen

Department of Neurology, the Second Affiliated Hospital of Chongqing Medical University, 76 Linjiang Road, Yuzhong District, Chongqing, 400010, China.
Figure S1. Funnel plot for publication bias test for mRS (0-2) at 3 months.

A

Begg’s funnel plot with pseudo 95% confidence limits

\[
\begin{array}{c|c|c|c|c|c}
\text{log} [\text{var 2}] & 0 & 0.2 & 0.4 & 0.6 & 0.8 \\
\text{s.e. of log [var 2]} & -2 & -1 & 0 & 1 & 2 \\
\end{array}
\]

B

Egger’s publication bias plot

\[
\begin{array}{c|c|c|c|c|c}
\text{standardized effect} & 0 & 5 & 10 & 15 & 20 \\
\text{precision} & -4 & -2 & 0 & 2 & 4 \\
\end{array}
\]

Figure S2. Publication bias test for mRS (0-2) at 3 months. A, Begg’s test, \( z = 0.30 \) (continuity corrected); \( p > |z| = 0.76 \) (continuity corrected). B, Egger’s test, \( p = 0.43 \); 95% CI, -1.73–3.45.
**Figure S3.** Funnel plot for publication bias test for mortality at 3 months.

**Figure S4.** Publication bias test for mortality at 3 months. A, Begg’s test, $z = 0.37$ (continuity corrected); $p > |z| = 0.71$ (continuity corrected). B, Egger’s test, $p = 0.46$; 95% CI, -2.41–1.24.
