Figure 5

(A) Bar graphs showing contraction to KCl and hypoxia (% of KCl) for Lean vs. Obese groups. Star (*) indicates significance.

(B) Graph showing contraction to KCl 80mM vs. Log [5-HT] (M) for Lean and Obese groups. Circles (○) for Obese and filled circles (●) for Lean. Star (*) and double star (**) indicate significance.

(C) Histogram showing % 5HT2A protein for Lean and Obese groups. Bar chart with Lean (white) and Obese (black) groups. Lean Obese Lean Obese Lean Obese

5HT2A β-Actin
