A graphical representation of the changes in leukocyte counts over time after BLM instillation. The graph shows the total leukocytes and neutrophils counts in different groups: BLM alone, Cont ODN, and CpG ODN.

- **A)** Total Leukocytes (x10^5)
  - **CpG ODN**
  - **Cont ODN**
  - **BLM alone**

- **B)** Lymphocytes (x10^4)
  - BLM alone
  - + Cont ODN
  - + CpG ODN

The graph illustrates a significant increase in leukocyte counts over time, particularly in the CpG ODN group. The statistical significance is indicated by **,** suggesting a p-value less than 0.01.
