Antioxidants (n=144)  
- 12 weeks  
- 24 spirometric tests  
- (3164 repeated measures)  
- Randomized trial  
  (placebo vs. Supplement)  
- GSTM1, GSTP1 genotypes  
  for 144 children  
- NQO1 genotype for 139 children

EVA (n=113)  
- 16 weeks  
- 8 spirometric tests  
- (1384 repeated measures)  
- Observational study  
- GSTM1, GSTP1 genotypes  
  for 113 children  
- NQO1 genotype for 60 children

At baseline:  
- Asthma diagnosis  
- FFQ  
- Blood sample  
- Skin test
