The images depict various plots showing the proportion of SNPs in LD with each rSNP across different conditions labeled RF0:IM0 and RF0:IM1. The plots are divided into two categories based on the number of SNPs in LD with each rSNP:

1. **1 SNP(s) in LD with each rSNP**
2. **4 SNP(s) in LD with each rSNP**

Each plot contains multiple curves representing different scenarios:

- **rSNPs, no LD.rSNPs**
- **rSNP/LD.rSNPs**
- **rSNPs, with LD.rSNPs**

The x-axis represents the number of SNPs, and the y-axis represents the proportion.
