The image contains four stacked graphs with the following labels:

1. **LTE** (Left): Normalized intensities for different samples labeled S1, S2, S3, and S4.
2. **STE** (Right): Normalized intensities for different samples labeled S1, S2, S3, and S4.

Each graph plots frequencies in ppm (parts per million) against intensity values. The graphs are labeled with frequencies ranging from 0.5 to 4.5 in increments of 0.5.
