Assessing Stability of Gene Selection in Microarray Data Analysis

SIMULDIST
Figure 1: Histograms of the number of selected genes across 200 simulation runs constructed for S15.
Figure 2: Histograms of the number of selected genes across 200 simulation runs constructed for S15COR.
Figure 3: Histograms of the number of selected genes across 200 simulation runs constructed for S43.
Figure 4: Histograms of the number of selected genes across 200 simulation runs constructed for S43COR.
