Smart cDNA with MS

Smart cDNA without MS

Normalization of cDNA using DSN

Adding SalI and NotI linkers

Hybridization with probe and magnetic capture

Elution

PCR with SalI and NotI-T25 primers, and then cut with SalI and NotI

Ligation into pVMC-Sport-6

Where

- Microsatellite
- SalI linker
- Smart PCR primer
- NotI linker
- Unredundant cDNA
- Redundant cDNA with microsatellite
- Redundant cDNA without microsatellite
