Figure 1

Graph showing the distribution of cells labeled with different markers. The markers include B220, MAC1, CD19, and CD19. The data points are plotted on a log-log scale, indicating the relative abundance of cells in different conditions.

Conditions tested:
- OP9
- OP9 + FL + IL7
- 3T3
- 3T3 + FL + IL7
- 3T3 + FL + IL7 + SDF1
- 3T3 + FL + IL7 + BMP4

The numbers in the boxes represent the percentage of cells expressing the respective markers under each condition.
