Supplementary Figure 1: EST read length statistics. Read lengths of 9696 ESTs after quality control. The average EST read length was 537 bp, read lengths peaked between 700 and 800 bp.
Supplementary Figure 2: Contig length statistics and EST numbers per contig.
a) length distribution of 2894 assembled contigs. The average contig length was 627 bp. Peak contig length was between 1000 and 1100 bp. b) number of ESTs per contig containing at least two ESTs. Most of ESTs existed as singletons only, 30,9% of all containing contained 2 ESTs. The average number of ESTs per contig was 3,1.
