**Figure A**

Diagram of protein interactions with nodes labeled as proteins and arrows indicating interactions or regulatory effects.

**Figure B**

Bar chart showing IFN-γ levels. The graph compares Control vs. Salmonella infection, with a significant difference indicated by P < 0.001.

**Figure C**

Bar chart showing fold change for various proteins. The fold change is measured for A1F1, IL1RN, IFNG, GBP4, and GBP5 with bars indicating error margins.
