Number of contigs per contig size class vs. Contig length (bp).

- **X-axis:** Contig length (bp)
- **Y-axis:** Number of contigs per contig size class
- **Additional Y-axis:** Percent of each contig size class annotated

The graph shows a positive correlation between contig length and the number of contigs, with a marked increase in the number of contigs as the contig length increases. The percent of each contig size class annotated shows a steady increase as well, indicating a higher percentage of long contigs being annotated compared to shorter ones.
