Figure 1

A, B: Col-0 and Camta1-3 seedlings grown in different concentrations of mannitol and PEG.

C: Bar graph showing root length in Col-0 and Camta1-3 at different mannitol concentrations.

D: Bar graph showing primary root length in Col-0 and Camta1-3 at different mannitol concentrations.

E: Bar graph showing shoot weight in Col-0 and Camta1-3 at different PEG concentrations.
