Denotations:

UI - Up-regulated in plants during incompatible interactions
DI - Down-regulated in plants during incompatible interactions
UC - Up-regulated in plants during compatible interactions
DC - Down-regulated in plants during compatible interactions

6/12 - In A: Data from 6 h compared with the same type of data from 12 h from either resistant or susceptible plants to identify commonly regulated genes.

In B: Data from resistant plants at 6 h compared with the same type of data from susceptible plants at 12 h to identify delayed response in susceptible plants.

In C: Data from resistant plants at 6 h compared with the opposite type of data from susceptible plants at 12 h (for example up-regulated in resistant plants compared with down-regulated in susceptible plants).

6/24, 12/24, 6/72, 12/72, 24/72 are defined in the same way.
