**Figure A**

Comparative images of different strains of Toxoplasma gondii: RH-ERP, RHΔgra2, RHΔgra2 + RH-GRA2, RHΔgra2 + GT1-GRA2, and GT1. The images show the expression of Irgb6/Hoechst in each strain.

**Figure B**

Bar chart showing the percentage of plaque loss (gray) and Irgb6 coating (black) for each strain:
- RH-ERP: 15%
- RHΔgra2: 30%
- RHΔgra2 + RH-GRA2: 25%
- RHΔgra2 + GT1-GRA2: 30%
- GT1: 22%

Significance levels indicated by asterisks:**
- **: p < 0.05
- **: p < 0.01
