Figure S2. The two individuals genotyped as having CNVR no. 45 (a deletion). The two top panels show the Log R ratio data and the bottom panels display the B allele frequency data. The light blue vertical lines depict the boundaries of the CNVR. In a) the individual with the CanineHD genotyped deletion that however showed a normal copy number by qRT-PCR. In b) the second sample with the CanineHD genotyped deletion that was not available for qRT-PCR validation.
