PC2

-6 12
-10 20

TIN-estimates:
≥ 1.0 ≤ -1.0

(a) Percentage of splicing factor genes

b) PC2
Breast cancer (n = 23; 27%)
Cervical cancer (n = 5; 18%)
Colorectal cancer I (n = 8; 31%)
Colorectal cancer II (n = 25; 25%)
Lung cancer II (n = 17; 40%)
Prostate cancer I (n = 63; 48%)
Prostate cancer II (n = 5; 10%)
Gastric cancer (n = 3; 12%)
Lung cancer I (n = 0)
Neuroblastoma (n = 9; 19%)

Splicing factor genes:
Significant correlation (P < 0.05)
Non-significant correlation (P > 0.05)
