The graph shows the count of FUT4 for different conditions: MES12, MES29, mink EF, iNV11, and iNV7. The count for MES12 is significantly higher compared to the other conditions.

- MES12 has the highest count, reaching close to 1500.
- MES29 has a count around 500.
- Mink EF has the lowest count, around 100.
- iNV11 has a count around 500.
- iNV7 has a count close to 1500.

Error bars indicate variability in the data.
