A bound and regulated at low Leu3 activity

- bound and regulated genes
- orthologs of bound and regulated genes
- sets of control genes (matched in binding potential to bound and regulated genes)
- orthologs of control genes

B bound and regulated but requiring high Leu3 activity to detect binding or regulation

- bound and regulated genes
- orthologs of bound and regulated genes
- sets of control genes (matched in binding potential to bound and regulated genes)
- orthologs of control genes
