Figure 4. Ontology using Swiss-Prot homologies

**Biological process**
- Viral life cycle
- Biological process unknown
- Development
- Regulation of biological process
- Cellular process
- Physiological process

**Molecular function**
- Chaperone regulator activity
- Nutrient reservoir activity
- Antioxidant activity
- Motor activity
- Molecular function unknown
- Enzyme regulator activity
- Signal transducer activity
- Transcription regulator activity
- Translation regulator activity
- Structural molecule activity
- Transporter activity
- Binding
- Catalytic activity

**Cellular component**
- Extracellular matrix
- Cellular component unknown
- Extracellular region
- Protein complex
- Organelle
- Cell
