The bar graph shows the number of BESs (Bacterial Eukaryotic Symbiont) hits for different BLASTN hits numbers. The x-axis represents the range of BLASTN hits numbers, while the y-axis represents the number of BESs. The graph indicates that the majority of BES hits fall within the 1-10 range, with significantly fewer hits in the 11-50 and 51-100 ranges. There are almost no hits in the 101-150, 151-200, and 201-249 ranges.
