Figure 5

[Graph showing the comparison of Total IgE (ng/ml) across different groups: Saline, HA, HA/Docetaxel, HA/Alum. The y-axis represents Total IgE (ng/ml) ranging from 0 to 2000, and the x-axis represents different groups. The bars indicate the mean ± standard deviation. The HA/Alum group shows a significantly higher IgE level compared to the other groups, marked with an asterisk (*).]
