Lung mycobacterial infection

Spleen CD4+ T cells
Spleen CD8+ T cells

Pulse naive CD11c+ APCs from BAL, Lung, and spleen with either Mtb-CF or live BCG

Co-culture antigen pulsed naive CD11c+ APCs with \textit{in vivo} primed T cells

**Fig. 6**

Graphs showing IFN-\(\gamma\) production in CD4+ and CD8+ T cells from BAL, Lung, and Spleen. Legends include Media, Mtb-CF, and BCG treatments.
