Figure 2: Effects of TNF mRNA expression.

(A) TNF mRNA expression levels (in AU) after exposure to different concentrations of TNF (0.1ng/ml, 1.0ng/ml, 10ng/ml, 100ng/ml, 1000ng/ml) and control (w/o). Asterisks indicate statistically significant differences compared to the control.

(B) TNF mRNA expression percentage over time (0h, 15min, 30min, 1h, 2h, 4h, 6h, 8h, 10h, 24h). Asterisks indicate statistically significant differences compared to the baseline (0h).
