**Figure A**

A Western blot analysis showing IL-8 and β-actin expression levels.

**Figure B**

Bar graph representing IL-8 mRNA expression relative to β-actin mRNA for different conditions:
- Caco-2 cells alone
- IL-1β
- WT
- ΔvscN1
- ΔvscN2
- Δvp1680
- Heat-killed WT

**Figure C**

Bar graph illustrating IL-8 concentration (pg/ml) over 6h and 24h for the same conditions as Figure B.
