Cycloheximide

with Q-VD-OPh

Staurosporine

with Q-VD-OPh

**A**

![Graph showing percent PI positive cells for untreated and treated samples.](image)

**B**

- Cycloheximide
- Staurosporine

**C**

24 h, 48 h, 72 h

Percent PI positive cells

Luminescence (RLU) x 10^6

- Untreated (U)
- LH37Ra
- shH37Ra
- iH37Rv
- STS
- CHX

**Significance Levels:**

- **p < 0.001**
- **p < 0.01**
- **p < 0.05**

**Notes:**

- The graphs illustrate the effect of different treatments on cell viability and luminescence over time.
