</tbody>
</table>

Note that not for all sRNAs probes are available on all platforms. The number of probes per platform also differs.

\(^a\) sRNA id: names of small RNAs for 87 sRNAs for which probes are available.

\(^b\) platform id: platform

\(^c\) number of probes of sRNAs: the number of probes on the array that can be used to estimate the expression of the sRNA (the higher the number of probes the more reliable the measurement of that sRNA). In total we had probes for 72 sRNAs.
