Figure 3.

![Graph showing log copies/ml EBV RQ-PCR and Q-EBV PCR results. The graph includes a mean line, a line for +1.96 SD, and a line for -1.96 SD. The x-axis represents log copies/ml EBV RQ-PCR + Q-EBV PCR, and the y-axis represents log copies/ml EBV RQ-PCR + Q-EBV PCR. Data points are plotted along the graph.]
