Additional figure 3. Secondary structure characteristics of Gli1 5’ UTRs. A visual representation of the secondary structures in the L, M and S 5’ UTR sequences, with or without exon 1B. The above structures were generated by the Mfold web-based server (http://mfold.bioinfo.rpi.edu/cgi-bin/rna-form1.cgi) [1]. Enclosed by a green line is the long stem-loop structure present in L, M and MΔ1B but not in LΔ1B.
