Figure (A) shows a gel electrophoresis image with molecular weight markers (kDa) at 21.5, 14.4, and 6.0. The lanes are labeled as Ec, Mt, E1, E2, E4, E5, E6, E7, E8, and E9, with two prominent bands labeled L27 and L27*. Figure (B) displays a Western blot analysis with a band labeled SmpB. Figure (C) indicates a control tmRNA with a band labeled tmRNA.
