The image shows a diagram with various odor descriptors and their corresponding thresholds. The diagram includes:

- **Spearmint oil** (calibration stimulus)
- **Pentadecalactone**
- **Propylene glycol**
- **Vanillin**
- **Androstenone**
- **Pentadecalactone**
- **Isovaleric acid**

The diagram also illustrates subjects' visit patterns and the exclusion criteria for low general olfactory acuity. The timeline includes visits 1 to 4, with stretches of 15 repeated stimuli and intensity and pleasantness ratings.
