Figure 4 Rose et al.

A. Graph showing the relationship between cell number (x10^4) and h-sAPPα (ng/ml) concentration.

B. Graph showing the relationship between incubation time (hours) and h-sAPPα (ng/ml) concentration.

C. Graph illustrating the release of h-sAPPα (ng/ml) over basal levels in response to different PDBu concentrations.

D. Bar graph comparing the effect of PDBu, PDBu+GF109203, and PDBu+Tapi0 on h-sAPPα (ng/ml) concentration. The values are normalized to control and marked with statistical significance: +46% and -66%.
