The graph shows the absorbance (%) over time post-SCI (min) for three different treatments: Saline, MnTBAP (4 mg/kg), and MPSS (9.2 mg/kg). The impact is indicated as a downward arrow at time 0. The absorbance values range from 0 to 250%.

- Saline: Represented by black circles.
- MnTBAP: Represented by white circles.
- MPSS: Represented by black triangles.

The bars indicate the standard error of the mean (SEM) for each data point.
