Figure 9

Bar graph showing Caspase-3 levels (% Control) with Glutamate + Estrogens (µM) treatment. The graph compares Control, Glu alone, and Glu + E2 treatments at concentrations of 0.01, 0.1, 1, and 10 µM.

Key:
- 17β-E2
- Δ⁸, 17β-E₂

*Note: The graph includes a legend indicating Caspase-3 and Actin bands for comparison.*
